DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Group I, claims 1 and 4, drawn to an information storage area provided in a flash memory for storing predetermined modifiable information; an address-modification control unit for, after at least one of modification of modifiable information stored in said information storage area and addition of modifiable information to said information storage area, performing modification or addition of an address, classified in classes 711, subclass 1 and 200.
 - II. Group II, claims 2 and 5, drawn to a combination of an information storage area provided in a ROM and a modified information storage area provided in a flash memory; and an address-modification control unit for, after the modifiable information is stored in said modified- information storage area, modifying an address, classified in class 711, subclasses 1 and 200.
 - III. Group III, claim(s) 3 and 6, drawn to an information-modification determining unit, classified in class 711, subclass 154.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate

utility such as in a system or method which lacked the combination of an information storage area provided in a ROM and a modified information storage area provided in a flash memory particulars and an address-modification control unit for, after the modifiable information is stored in said modified- information storage area, modifying an address particulars, or an information-modification determining unit particulars of the other inventions. Similarly, each of the other subcombinations (i.e., each invention II through III) is separately useable. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Denise Tran whose telephone number is (703) 305-
